Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: .material itself 3.----As a means of controlling uniformity in the preparation and manufacture of materials In the preparation or interpretation of any specification for bituminous road or paving materials, an appreciation of the interrelation of tests and test limits is as necessary as an understanding of the individual significance of the tests themselves. For example in the requirement for penetration of asphalt a common range of value is between 40 and 60 with a number 2 needle and a load of 100 grams acting through five seconds. The amount of penetration depends largely upon the bitumen content and on the light oils in the asphalt. In a pavement subjected to heavy traffic a penetration of about 40 is desirable for the asphalt used and greater than 45 should not be used. Again, the ductility of the asphalt may have a range in value Value...
