RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 408 pages. Dimensions: 9.7in. x 7.4in. x 0.8in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: . . . it and create a serious fire hazard. If it is desired to use such heating devices in the house, it will be necessary to install special separate circuits using wire of a size not smaller than No. 10. A 20-ampere receptacle should be placed in the wall and a 20-ampere attachment plug should be used at the end of the flexible cord attached to the heating device. Possible future requirements should be anticipated and not less than two of these special circuits should be installed when the house is wired. Lighting fixtures should be obtained which are wired with a size of wire not smaller than No. 16. Except in fixtures no wire smaller than No. 12 should be used with a 30-volt system. If the equipment, including switches, sockets, and ordinary lighting fixtures, is of the kind which would be installed for a 110-volt system, there will be a serious danger in afterwards making connections to such lighting fixtures for such heating devices as fiatirons. In view of the conditions just outlined, it is well for anyone installing such a private plant to give serious consideration to the advisability of installing a plant for 110 volts. As has been noted above, this involves a greater cost for storage battery and it will also involve a greater cost for storage-battery maintenance. At the same time it will permit the installation of less expensive wiring and equipment in the building and it will also have the advantage...
