TB MED 148 CHAPTER 3 OPERATIONS 3 - 1. Clinical considerations Pre-treatment aids, including full mouth radiographs and diagnostic casts, should be used to determine the final treatment plan for each patient to receive prosthodontic care. Modifying considerations such as patient status, time available to complete treatment, and patient interest as well as ability to perform required oral health maintenance procedures must be recognized. a. Abutment selection for fixed dental prostheses should follow accepted guidelines and provide adequate support for the intended prosthesis. The use of cantilever-fixed dental prostheses should be carefully evaluated. b. Intra-coronal retainers (inlays) are undesirable abutments for fixed dental prostheses. c. Fixed restorations of eight or more units or requests for restorations using commercially designed attachments, unless submitted by a trained prosthodontist, will be referred to the USADL for consultation prior to tooth preparation. d. All ceramic restorations are generally not indicated for teeth posterior to the second premolar. e. Resin-bonded prosthodontic restorations...

Reviews

Completely essential read publication. It is really basic but excitement in the fifty percent of the book. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about in the event you ask me).
