

Biennial Report of the State Game, Fish and Forestry Warden (Paperback)

By Fish and Michigan State Game

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: .Its principal diet is crawfish, mussels, chubs and shiners. There is no question but that it preys on ruffed grouse, rabbits and brook trout, but not to the same extent as the fox on birds. Mtiskrat This prolific animal, which breeds several times in a season, is holding its own in the wilds and on the borders of civilization, except in localities where trapping activities are excessive. White Weasel or Ermine --This predaceous animal, much more destructive to useful animal life than its larger cousin, the mink, is gradually decreasing in number. A tit-bit fur, in its winter coat its pelt brings the trapper greater returns for its size than that of any other animal. Fisher Cat--This member of the weasel family, never numerous, is now very scarce, but in limited numbers is still found in all sections of the forest district of Michigan....
