

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 13 (Paperback)

Filesize: 4.45 MB

Reviews

Very helpful to any or all category of folks. It is written in simple phrases rather than difficult to understand. It has been developed in an exceptionally simple way and is particularly just after I finished reading this pdf in which basically transformed me, modified the way in my opinion.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1870 Excerpt: .all 3.)--(2) This line is also cut harmonically by every pair of cubics through the intersections of the first two.--(3) The envelope of a line cut harmonically by a given cubic and by the cubic made up by the polar line and conic of a given point is the mixed concomitant al^2 . al^3 .--(4) Two cubics having the same inflexions cut harmonically any line whatever. Solution by 3. J. Walker, M.A. 1. If the two triads of points be determined by the two cubics $(a, b, c, d)(x, y, z)$, $(a, V, c, d)(x, y, z)$, it is readily found, by forming the expressions for the segments in terms of the roots, that the condition of harmonic division, as defined, is $ad - a d - Z(bc - b c) = 0$, or 12 (Salmon, Higher Algebra, p. 121). Hence the condition for two cubic curves, $-=0$, $v = 0$, cutting a transversal $a v + 0y + yz$ harmonically would be found by substituting $-l-x + -y) y y /$ for z in u and v , and operating on the result with 12 . But the same thing may be done without substitution by operating on uv directly, considering sat a function of x and y determined by $ax + 0y + yz = 0$. Then in the 3052. (Proposed by the Eev. W. A. Whitworth, M.A.)--A catapult is formed by fixing the ends of an elastic string (natural length = 11) at points A and A on a horizontal...
